SURESHIELD® Polyester Resin Floor Topping

Sureshield is a 6-9mm industrial grade floor topping system specifically designed for the New Zealand food industry. Sureshield resin is blended with specially graded silica-quartz aggregates to produce a flooring system that is hard and durable, resistant to impact, abrasion, thermal shock and chemicals, yet is non-porous, hygienic and is easily cleaned.

Benefits:

- Decorative options available.
- Proven performance for over 30 years in the food industry.
- Available in a number of coloured applications.
- Quick set rates for minimal business disruption.
- Zero Odour options available.
- Easy to repair - damaged areas are cut out and retrowelled back to grade level with new materials.
- Hygienic - impermeable and non-porous with a good working surface finish, and is speedily washed and cleaned. It does not support bacteria or fungal growth, and contains Sterishield.
- Heavy duty - Resistant to cracking and crazing, has high thermal shock resistance, abrasion resistance and very good chemical resistance.
- Higher chemical resistance can be achieved with Vinyl Ester Resin.

DEGADUR®

degadur® Seamless-Surface Solutions

Degadur® is a heavy duty colour quartz with a smooth and slip resistant finish, ideal for wet areas.

Benefits:

- Fully cured in 2 hours, minimal downtime
- Hygienic and easy to clean
- UV and temperature resistant
- Slip resistance properties can be varied.
- Flexible whilst retaining strong impact resistance.
- Chemical bond between layers creates a truly monolithic floor.

EPOXY COATINGS

nuplex
construction
products

Terratuff

- 2 pack self levelling epoxy
- High gloss finish
- Hard wearing chemically resistant
- Ease of application

Surecote 200

- 2 pack high build epoxy coating
- Low odour
- Will tolerate damp concrete
